Professional Summary

I am a UI/UX designer focused on crafting intuitive, user-centered digital experiences. I bring a strong background in 3D art and visualization, which helps me create richer visual concepts and high-fidelity prototypes. I also apply my front-end development skills to build responsive, accessible interfaces and collaborate smoothly with engineering teams.

Experience

UX/UI Designer | Raccoon Labs | 01/2019 - Present

I led the design and development of engaging user interfaces and experiences (UI/UX) for websites and applications, aligning aesthetic direction with usability principles to ensure intuitive digital journeys.

I developed and executed digital marketing campaigns with optimized visual content for web and social media, reinforcing brand identity and audience engagement across multiple channels.

I designed and built simple informational websites such as landing pages and service pages, ensuring clarity, responsiveness and user-friendly layouts aligned with client goals.

UX/UI Designer & Digital Artist | Tolomeo Software | 12/2023 – 5/2025

I led the redesign of user interfaces for casino games, enhancing accessibility, engagement, and visual cohesion across multiple products. This initiative significantly improved player retention and overall user satisfaction.

I established and standardized visual production workflows, optimizing team efficiency, reducing delivery times, and ensuring consistent quality across design outputs.

I contributed to the front-end development of websites, ensuring responsive layouts, cohesive visual integration, and seamless user experiences across devices.

Education

Bachelor's degree in digital animation | Universidad Veritas | San José, Costa Rica | 10/2021
